- Viendo el código fuente del sitio, se deduce el texto de la contraseña de color blanco como el fondo.

The screenshot shows the browser's developer tools with the "view-source" tab selected. The page title is "Not Secure". The address bar shows "view-source: data:text/html; charset=utf-8 %3Cmain id%3D"main" class%3D"site-main" role%3D"main%" . The page content is the raw HTML source code of a blog post. The code includes a main header with the author's name, a post header with a link to the full article, and a body paragraph. There is also a redacted section and a footer.
